written test : consists of articles, synonyms,prepositions.its easy if u go thro, basic grammar rules n then 2 comprehensions 1 passag was easy....

n other was bit difficult so beter u try first as u dont hav time left i think proper time management too is important data sufficiency i made guesses here then venn diagrams prepare frm r.s.agarwal

1- $\$,0-^* \rightarrow$ then $60^2-59^2=?$ this is of the form $a+b)(a-b)$ n convert to binary format n do nzt section + replaced by / - by * * by + / by - so they ll giv u equations find the answer its easy

they ll giv u 3 numbers u need to find whether all r alik,or any two r alike et n last 5 min they gav us to write an essay : "my college life"

GD

I am vrey much scared of this round as this is the main elimination i tell u never b nervous just try to speak some valid points that u hav but i tel u dont repeat the points so beter take an oportunity to speak as early as possible n b confident too they askd us to decide a topic:

we hav a good team coordination so v hav chosen "should mobiles b banned in colg" "lov vs arrangd" etc but some panels gav the topic its difficult i think so believe n pray god

HR

the hr was mam she was so friendly n cool she askd me tel me abt urslf other than wats there in my resume for every strngth she askd me to support that wat does success mean to u? y accenture? wiling to relocate? hobbies etc..... prepare for askng quesitons as they asks u "any question"?
